🤖 AI & Media Engine

AZIRYTECH ENTERPRISE

Software Development & WhatsApp Automation Solutions

Version: 3.0.7 MD

Support: support@knightbot.com

Release: September 2026

⚡ About KnightBot Multi-Session Engine

KnightBot-MD is a state-of-the-art multi-tenant WhatsApp bot framework powered by Baileys. It allows connecting and managing **50+ independent concurrent WhatsApp sessions** simultaneously with isolated encrypted credential stores, real-time telemetry, and automated anti-ban protections.

📱 Method 1: Pairing Code Linking

Enter your international phone number in the dashboard to receive an instant 8-digit verification code. Link directly via *WhatsApp > Linked Devices > Link with phone number*.

📷 Method 2: QR Code Scanning

Generate a high-resolution dynamic QR code on the dashboard and scan it in seconds with your phone camera.

🛡️ Privacy & Zero Logging

Direct Noise-protocol socket encryption. Chat logs, media, and private contacts are never stored or forwarded to third-party servers.

🔑 1-Click Instant Disconnect

Revoke bot access anytime directly from the Web Dashboard or in the WhatsApp app (*Linked Devices > Log Out*).

🌐 1. General & Utility Commands

18 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.help / .menu</code>	<code>.help</code>	ALL	Displays the comprehensive bot command dashboard and feature list. <i>Example: .menu</i>
<code>.ping</code>	<code>.ping</code>	ALL	Measures response latency and verifies active socket connection speed. <i>Example: .ping (Returns response time in ms)</i>
<code>.alive</code>	<code>.alive</code>	ALL	Returns bot operational uptime, active version, and server health status. <i>Example: .alive</i>
<code>.tts</code>	<code>.tts <text></code>	ALL	Converts written text into high-fidelity voice audio note. <i>Example: .tts Welcome to Azirytech Services</i>
<code>.trt / .translate</code>	<code>.trt <text> <lang></code>	ALL	Translates text into any language (sw, en, es, fr, ar, hi, etc.). <i>Example: .trt Hello friend sw</i>
<code>.weather</code>	<code>.weather <city></code>	ALL	Fetches live meteorological data, temperature, humidity, and forecast. <i>Example: .weather Dar es Salaam</i>
<code>.news</code>	<code>.news</code>	ALL	Fetches current global top trending news headlines. <i>Example: .news</i>
<code>.lyrics</code>	<code>.lyrics <title></code>	ALL	Searches and retrieves full song lyrics. <i>Example: .lyrics Shape of You</i>
<code>.8ball</code>	<code>.8ball <question></code>	ALL	Delivers a random mystical prediction to any yes/no question. <i>Example: .8ball Will we succeed today?</i>

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.joke</code>	<code>.joke</code>	ALL	Generates a clean, humorous random joke. <i>Example: .joke</i>
<code>.quote</code>	<code>.quote</code>	ALL	Displays an inspiring quote from renowned historical figures. <i>Example: .quote</i>
<code>.fact</code>	<code>.fact</code>	ALL	Provides a verified fascinating fact about science, nature, or history. <i>Example: .fact</i>
<code>.attp</code>	<code>.attp <text></code>	ALL	Generates an animated flashing multi-color text sticker. <i>Example: .attp Azirytech</i>
<code>.ss</code>	<code>.ss <url></code>	ALL	Captures a full high-resolution screenshot of any webpage. <i>Example: .ss https://google.com</i>
<code>.url</code>	<code>.url (reply to media)</code>	ALL	Uploads image/video to cloud CDN and returns a permanent link. <i>Example: Reply to image with .url</i>
<code>.vv / .viewonce</code>	<code>.vv (reply to viewonce)</code>	ALL	Converts ephemeral View-Once photos/videos into normal permanent media. <i>Example: Reply to view-once media with .vv</i>
<code>.jid</code>	<code>.jid</code>	ALL	Displays the exact WhatsApp user/group identifier (JID). <i>Example: .jid</i>
<code>.owner</code>	<code>.owner</code>	ALL	Sends the official vCard contact of the bot administrator. <i>Example: .owner</i>

2. Group Admin & Moderation Commands

24 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.kick</code>	<code>.kick @user</code>	ADMIN	Instantly removes a specified member from the group. <i>Example: .kick @255712345678</i>
<code>.promote</code>	<code>.promote @user</code>	ADMIN	Promotes a standard member to group administrator. <i>Example: .promote @user</i>
<code>.demote</code>	<code>.demote @user</code>	ADMIN	Revokes administrator privileges from a group admin. <i>Example: .demote @user</i>
<code>.mute</code>	<code>.mute [minutes]</code>	ADMIN	Closes the group so only admins can send messages. Supports auto-timer. <i>Example: .mute 30 (Mutes group for 30 mins)</i>
<code>.unmute</code>	<code>.unmute</code>	ADMIN	Re-opens group messaging permissions for all participants. <i>Example: .unmute</i>
<code>.delete / .del</code>	<code>.del (reply to msg)</code>	ADMIN	Deletes any spam or inappropriate message in the group. <i>Example: Reply to spam message with .del</i>
<code>.warn</code>	<code>.warn @user</code>	ADMIN	Adds a warning strike to a member. Reaching 3 strikes auto-kicks user. <i>Example: .warn @user Rule violation</i>
<code>.warnings</code>	<code>.warnings @user</code>	ADMIN	Checks total warning strikes accumulated by a member. <i>Example: .warnings @user</i>
<code>.ban</code>	<code>.ban @user</code>	ADMIN	Blocks a user from executing any bot commands globally. <i>Example: .ban @user</i>
<code>.unban</code>	<code>.unban @user</code>	ADMIN	Restores command execution access for a banned user. <i>Example: .unban @user</i>
<code>.tagall</code>	<code>.tagall <announcement></code>	ADMIN	Tags all participants in the group with an announcement banner. <i>Example: .tagall Meeting starts now!</i>
<code>.hidetag</code>	<code>.hidetag <message></code>	ADMIN	Invisibly tags every group member without listing phone numbers. <i>Example: .hidetag Urgent notice</i>
<code>.tag</code>	<code>.tag <text></code>	ADMIN	Mentions group members with customized formatting. <i>Example: .tag Good morning all</i>
<code>.tagnotadmin</code>	<code>.tagnotadmin</code>	ADMIN	Tags all non-admin regular members. <i>Example: .tagnotadmin</i>
<code>.antilink</code>	<code>.antilink <on/off></code>	ADMIN	Auto-detects and deletes external invite links, removing spammers. <i>Example: .antilink on</i>

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.antibadword</code>	<code>.antibadword <on/off></code>	ADMIN	Filters offensive/vulgar language and deletes matching messages. <i>Example: .antibadword on</i>
<code>.antitag</code>	<code>.antitag <on/off></code>	ADMIN	Blocks non-admin participants from mass-mentioning group members. <i>Example: .antitag on</i>
<code>.welcome</code>	<code>.welcome <on/off></code>	ADMIN	Enables automated welcome banners when new members join. <i>Example: .welcome on</i>
<code>.goodbye</code>	<code>.goodbye <on/off></code>	ADMIN	Enables automated departure notices when a participant leaves. <i>Example: .goodbye on</i>
<code>.resetlink</code>	<code>.resetlink</code>	ADMIN	Revokes the current group invite link and creates a new one. <i>Example: .resetlink</i>
<code>.groupinfo</code>	<code>.groupinfo</code>	ALL	Displays group creation timestamp, member count, and admin roster. <i>Example: .groupinfo</i>
<code>.staff / .admins</code>	<code>.staff</code>	ALL	Lists all appointed administrators in the current group. <i>Example: .staff</i>
<code>.topmembers</code>	<code>.topmembers</code>	ALL	Ranks the most active chat participants in the group. <i>Example: .topmembers</i>
<code>.setgname</code>	<code>.setgname <name></code>	ADMIN	Modifies the group subject title. <i>Example: .setgname Azirytech Developers</i>

3. Bot Owner & Server Control Commands

16 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.mode</code>	<code>.mode <public/private></code>	OWNER	Switches bot access between public (everyone) and private (owner only). <i>Example: .mode public</i>
<code>.antidelete</code>	<code>.antidelete <on/off></code>	OWNER	Intercepts revoked/deleted messages and forwards content to owner DM. <i>Example: .antidelete on</i>
<code>.anticall</code>	<code>.anticall <on/off></code>	OWNER	Automatically declines incoming audio and video WhatsApp calls. <i>Example: .anticall on</i>
<code>.autostatus</code>	<code>.autostatus <on/off></code>	OWNER	Automatically reads and views incoming contact status updates. <i>Example: .autostatus on</i>
<code>.autotyping</code>	<code>.autotyping <on/off></code>	OWNER	Displays permanent "typing..." presence indicator in chats. <i>Example: .autotyping on</i>
<code>.autoread</code>	<code>.autoread <on/off></code>	OWNER	Automatically marks incoming messages as read (blue checkmarks). <i>Example: .autoread on</i>
<code>.autoreact</code>	<code>.autoreact <on/off></code>	OWNER	Automatically reacts to incoming messages with expressive emojis. <i>Example: .autoreact on</i>
<code>.pmblocker</code>	<code>.pmblocker <on/off></code>	OWNER	Restricts bot usage to groups, blocking unsolicited private messages. <i>Example: .pmblocker on</i>
<code>.chatbot</code>	<code>.chatbot <on/off></code>	OWNER	Enables automated AI conversation engine for natural chat replies. <i>Example: .chatbot on</i>
<code>.clearsession</code>	<code>.clearsession</code>	OWNER	Cleans orphan socket files and stale signal credentials. <i>Example: .clearsession</i>
<code>.cleartmp</code>	<code>.cleartmp</code>	OWNER	Purges temporary media cache and downloads to free server storage. <i>Example: .cleartmp</i>
<code>.update</code>	<code>.update</code>	OWNER	Pulls and compiles the latest bot update from the GitHub repository. <i>Example: .update</i>
<code>.settings</code>	<code>.settings</code>	OWNER	Displays real-time system configuration parameters and active flags. <i>Example: .settings</i>

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.setpp</code>	<code>.setpp (reply to img)</code>	OWNER	Changes the bot's WhatsApp profile picture. <i>Example: Reply to image with .setpp</i>
<code>.mention</code>	<code>.mention <on/off></code>	OWNER	Enables automatic audio/sticker replies whenever the bot owner is tagged. <i>Example: .mention on</i>
<code>.sudo</code>	<code>.sudo <add/del> @user</code>	OWNER	Grants or revokes secondary bot owner access permissions. <i>Example: .sudo add @user</i>

4. AI Intelligence & Image Generation

6 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.ai / .gpt</code>	<code>.ai <question></code>	ALL	Answers any question, debugs code, or writes essays using ChatGPT. <i>Example: .ai Write a JavaScript function for quicksort</i>
<code>.gemini</code>	<code>.gemini <prompt></code>	ALL	Leverages Google Gemini AI for advanced multi-turn reasoning. <i>Example: .gemini Explain quantum computing simply</i>
<code>.imagine</code>	<code>.imagine <prompt></code>	ALL	Generates high-definition artwork from creative text descriptions. <i>Example: .imagine Futuristic cyberpunk city with neon lights</i>
<code>.flux</code>	<code>.flux <prompt></code>	ALL	Generates ultra-photorealistic portraits with advanced FLUX diffusion. <i>Example: .flux Cybernetic lion in golden armor 8k</i>
<code>.sora</code>	<code>.sora <prompt></code>	ALL	Generates hyper-realistic conceptual visual graphics. <i>Example: .sora Deep ocean glowing crystal reef</i>

📁 5. Media & Social Media Downloaders

8 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.song / .play</code>	<code>.song <title></code>	ALL	Searches YouTube and downloads high-bitrate MP3 audio with album art. <i>Example: .song Perfect Ed Sheeran</i>
<code>.video / .ytmp4</code>	<code>.video <title or link></code>	ALL	Downloads crisp 720p/1080p MP4 video from YouTube. <i>Example: .video Alan Walker Faded</i>
<code>.spotify</code>	<code>.spotify <track query></code>	ALL	Searches Spotify database and extracts full audio track. <i>Example: .spotify Starboy The Weeknd</i>
<code>.instagram / .ig</code>	<code>.instagram <link></code>	ALL	Downloads Instagram Reels, Posts, Videos, and Carousel Photos. <i>Example: .instagram https://instagram.com/reel/xyz</i>
<code>.tiktok</code>	<code>.tiktok <link></code>	ALL	Extracts TikTok videos in HD without any watermark. <i>Example: .tiktok https://vm.tiktok.com/xyz</i>
<code>.facebook / .fb</code>	<code>.facebook <link></code>	ALL	Downloads public Facebook video clips and reels in high resolution. <i>Example: .facebook https://fb.watch/xyz</i>
<code>.igs</code>	<code>.igs <username or link></code>	ALL	Downloads live Instagram Stories. <i>Example: .igs https://instagram.com/stories/xyz</i>

🎨 6. Sticker Studio & Graphic Transformation

10 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.sticker / .s</code>	<code>.s (reply to img/video)</code>	ALL	Converts static image or short GIF/video into a WhatsApp sticker. <i>Example: Reply to image with .s</i>
<code>.crop</code>	<code>.crop (reply to image)</code>	ALL	Crops any aspect ratio image into a perfect 1:1 square sticker. <i>Example: Reply to portrait image with .crop</i>
<code>.simage</code>	<code>.simage (reply sticker)</code>	ALL	Converts a WhatsApp sticker back into a standard JPG photo. <i>Example: Reply to sticker with .simage</i>
<code>.tgsticker</code>	<code>.tgsticker <link></code>	ALL	Converts an entire Telegram sticker pack into WhatsApp stickers. <i>Example: .tgsticker https://t.me/addstickers/pepe</i>
<code>.take</code>	<code>.take <pack> <author></code>	ALL	Changes sticker author name and pack branding metadata. <i>Example: Reply with .take Azirytech KnightBot</i>

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.removebg</code>	<code>.removebg (reply image)</code>	ALL	Removes the photo background, rendering a transparent PNG. <i>Example: Reply to image with .removebg</i>
<code>.remini</code>	<code>.remini (reply image)</code>	ALL	AI upscales blurry or low-resolution images into crisp HD. <i>Example: Reply to photo with .remini</i>
<code>.emojimix</code>	<code>.emojimix 🤪+🔥</code>	ALL	Blends two emojis together into a custom merged sticker. <i>Example: .emojimix 🤪+❤️</i>
<code>.blur</code>	<code>.blur (reply image)</code>	ALL	Applies an aesthetic Gaussian blur filter to an image. <i>Example: Reply to image with .blur</i>
<code>.meme</code>	<code>.meme</code>	ALL	Fetches a fresh, hilarious meme from Reddit/Twitter. <i>Example: .meme</i>

🎮 7. Games & Group Entertainment

7 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.tictactoe</code>	<code>.tictactoe @user</code>	ALL	Launches a live interactive Tic-Tac-Toe match in the chat. <i>Example: .tictactoe @user</i>
<code>.hangman</code>	<code>.hangman</code>	ALL	Starts a word-guessing Hangman challenge with interactive board. <i>Example: .hangman</i>
<code>.guess</code>	<code>.guess <letter></code>	ALL	Submits a letter guess in an active Hangman session. <i>Example: .guess a</i>
<code>.trivia</code>	<code>.trivia</code>	ALL	Generates a multi-choice general knowledge quiz question. <i>Example: .trivia</i>
<code>.answer</code>	<code>.answer <option></code>	ALL	Submits your answer to the active trivia question. <i>Example: .answer B</i>
<code>.truth</code>	<code>.truth</code>	ALL	Gives an exciting Truth question for party games. <i>Example: .truth</i>
<code>.dare</code>	<code>.dare</code>	ALL	Gives a daring challenge for party games. <i>Example: .dare</i>

🎭 8. Fun, Roleplay & Social Commands

11 Commands

COMMAND	SYNTAX	ACCESS	DESCRIPTION & EXAMPLE
<code>.compliment</code>	<code>.compliment @user</code>	ALL	Sends a wholesome, heartfelt compliment to a friend. <i>Example: .compliment @user</i>
<code>.insult</code>	<code>.insult @user</code>	ALL	Sends a witty and playful roast to a tagged participant. <i>Example: .insult @user</i>
<code>.flirt</code>	<code>.flirt</code>	ALL	Generates a charming romantic pickup line. <i>Example: .flirt</i>
<code>.shayari</code>	<code>.shayari</code>	ALL	Generates poetic Shayari verses. <i>Example: .shayari</i>
<code>.ship</code>	<code>.ship @user1 @user2</code>	ALL	Calculates romantic compatibility percentage between two users. <i>Example: .ship @alex @sarah</i>
<code>.character</code>	<code>.character @user</code>	ALL	Generates a humorous personality profile card. <i>Example: .character @user</i>
<code>.wasted</code>	<code>.wasted @user</code>	ALL	Creates a GTA-style "Wasted" death overlay on the user's avatar.
